

IOS Adapter Kit

Thank you for your understanding as we make improvements to the VR headset design, functionality & universal compatibility.

Please use these adapter sticker/buttons to stick just above where the rubber tab moves out of the front of the VR headset located inside the VR headset on the screen side of your phone when the phone is placed in the VR Headset. The rubber tab moves out of the front of the VR headset when the OK button is pressed.

Depending on if you have a case on your phone or not and the size of your phone will impact the exact placement of the adapter. We have included additional adapters for testing out the correct fit.

Please email info@buywondertech.com or call us 1-888-730-9880 if you run into any issues. We are here to help!

In the meantime we would love to share some exciting news. We have put together a list of all of the apps that work with IOS and the Bluetooth remote control, we will add this to the website. In the meantime if you go to the Apple Store and search for "icade" this is the programming platform the remote is built on and a list of compatible apps comes up.
